Importance: High

Attached are various files for your initial review/evaluation and for planning. Please read all the way down.

Sam and I talked about having you guys take a look and we can then talk about what changes are needed, next steps, timing, etc.

Not counting the front matter, references or appendices, the Tox Review is ~175 pages long. Whee-Hoo!

The document has been reviewed in RTP but has not had a contractor Tech Edit. Please let us know if this is to be done, and mechanism; we have very little capacity now to do tech editing due to RTP staffing limits.

Here are the two 'traditional' fact sheets. Sam noted we need to create a IASD briefing from the longer Fact Sheet below - we'll do this as was done for PCBs etc and send later.

Here is a summary of the changes since peer review:

Deliberative Process / Ex. 5

Here is the "priority order" of comments that was created for discussion at the "mark-up" meeting. We didn't talk about all of these but mostly went down the list for the most important ones:

Deliberative Process / Ex. 5

A proposed briefing with the intended audience of Bob Kavlock is attached, which includes quite a bit more science detail as we understand he would like to see.

The NRC chart is also included;

In a separate email later today or tomorrow I'll send a Compare document (comparing draft above to the peer review draft). This is a big and very messy file due to all the changes, so I'll send separately.

I suggest ya'll take a look and let's have a discussion to organize efforts to move this toward posting.

As always, my very great appreciation to Jeff Gift and the large team that has worked diligently on this for a long long time!

Thanks,

John
